

LukWerks™ Outdoor Camera

The Outdoor Camera provides you with security that no other video security system can provide – protecting the outside of your home or business with a weatherproof camera that withstands water and temperature extremes.

With the Outdoor Camera, you'll see everything that is happening on the exterior of your property because the smart camera provides superior image quality, motion detection, and intelligent image management. The Outdoor camera also works with your existing LukWerks system, so you can mix and match Indoor, Outdoor, and Spy cameras with ease.

Installation and setup of the Outdoor Camera is a breeze because all of our cameras are built using Universal Plug and Play (UPnP) — LukWerks automatically finds the camera almost as quickly as you plug it in.

Expand the power of your video security system by adding up to five additional cameras (outdoor, indoor, and spy) for a total of six.

High-quality video in low-light conditions

LukWerks records high-quality video even in low-light settings or at night with outdoor lighting.

EASY 3-STEP SETUP

CAMERA HIGHLIGHTS

- Weatherproof, sleek design
- High-quality, color video (VGA or QVGA)
- 400 MHz onboard processor
- Digital motion detection
- Built-in video compression stores more video longer
- Automatically adjusts for changing light conditions
